DATE MAILED:

Please find below and/or attached an Office communication concerning this application or proceeding.

Commissioner for Patents

The brief is still noncompliant because the applicant has failed to provide the claimed subject matter of each independent claim mapped to the specification by page and line number or by paragraph number so that the varying scope of each of the independent claims can be determined.

In the brief mailed on October 29, 2008, the applicant fails to be more specific of where in the specification by page and line number the claimed invention was presented. The applicant just merely cited paragraph numbers.

The current amendment filed on November 24, 2008 fails now to provide and specific page or paragraph and line number for each element claimed in the independent claims.

For example, applicant should reproduce the claimed subject matter of each independent claim and throughout the claim state concisely where in the specification support for the claimed structure (actual and functional) can be found. Reference to drawing numerals is also required.

NO NEW TIME PERIOD IS BEING SET BY THIS PAPER. Applicant's time period continues to run from the notice sent out on November 24, 2008.
